
Overview of User Guide

Getting Started

- Overview of AppTransaction Xpert
- System Environment

Capturing Application Traffic

- Capturing Application Traffic: Overview
- Capturing Traffic with AppTransaction Xpert
- Continuous Captures
- Distributed Agent Controller

Previewing, Importing, and Filtering Traffic

- Previewing and Extracting Traffic from Packet Traces
- Creating a Transaction Analyzer Model
- Filtering Traffic

WAN Accelerators

- WAN Accelerators and AppTransaction Xpert
- Capturing Application Traffic in a WAN-Accelerated Environment
- Importing WAN-Accelerated Capture Data

Visualizing Applications

- Tree View
- Data Exchange Chart
- Tier Pair Circle
- Viewing Statistics
- Scripts for Filtering, Analyzing, and Visualizing

Analyzing and Diagnosing Applications

- Analyzing Network and Tier Delays
- Protocol Decodes
- Diagnosing Applications with AppDoctor
- Troubleshooting with Patterns

Predicting Application Performance

- Predicting Application Performance with QuickPredict and QuickRecode

Publishing Reports

- Publishing Reports
-

***Editing and
Designing
Applications with
Transaction
Whiteboard***

- Transaction Whiteboard: Overview
- Transaction Whiteboard: User Interface and Procedures
- Modeling Complex Application Behavior with Logic Scripts
- Modeling Web Services in Transaction Whiteboard
- Modeling Applications over UDP with Transaction Whiteboard

Workflows

- Capturing Packets in Cisco WAAS Environments
- Capturing Packets in Riverbed Steelhead Environments

Appendices

- Miscellaneous Operations
- Preferences
- Using SSL Encryption with AppTransaction Xpert
- WAN Acceleration Worksheet
- Tier Renaming: Advanced Workflow for WAN-Accelerated Environments
- Direct Captures on Cisco WAE Accelerators
- Direct Captures on Riverbed Accelerators
- Capturing Application Traffic with tcpdump
- On-Demand Agentless Captures (Experimental)
- Icon Database Editor
- Editing the TCP Window Scale
