
Transaction Analyzer Tutorials

The following hands-on tutorials are designed as an introduction to the Transaction Analyzer window, which is AppTransaction Xpert's central tool. The Transaction Analyzer window includes three tabbed pages: Tree View, Tier Pair Circle, and Data Exchange Chart.

You can perform the tutorials in any order, depending on your need. However, to get the most out the experience, perform the tutorials in the order listed below, taking the time to think through the lessons.

- Quick Start
- FTP Application
- Predicting Application Response Times
- Predicting Application Deployment with Transaction Analyzer Models
- Troubleshooting a Network with WAN Accelerators
