Transaction Analyzer Examples

The following hands-on examples are designed as an introduction to the Transaction Analyzer window, which is AppTransaction Xpert's central tool. You can perform the examples in any order, depending on your need. However, to get the most out the experience, perform the examples in the order listed below, taking the time to think through the lessons.

- Impact of Limited Bandwidth on a Web Application
- Impact of Retransmissions on a File Transfer
- Examining a Web-Based Oracle Application
- Examining a Sybase Application
- Impact of TCP Window Size on a File Transfer
