Transaction Whiteboard Tutorials

The following hands-on tutorials are designed as an introduction to Transaction Analyzer Whiteboard, which is AppTransaction Xpert's tool for designing and editing an application's behavior in a graphical environment. You can perform the tutorials in any order, depending on your need. However, to get the most out the experience, perform the tutorials in the order listed below, taking the time to think through the lessons.

- Transaction Whiteboard: Creating an Application Model

- Transaction Whiteboard: Modifying an Application Model

- Transaction Whiteboard: Modeling an Application with Logic Scripts (Advanced)
